

Data Engineer

Atriis Technologies

Location: Porto Hybrid

About Atriis

Atriis – a travel tech SaaS company on its mission to enable true digital transformation in the travel industry, introduced the market with its disruptive technologies, helping travel companies (B2B and B2C) to reinvent the way how they create a unique traveler experience and explore unlocking new revenue lines streams for their business. We have cutting-edge technology with an amazing team of very ambitious employees, and we are causing a huge disruption in the industry!

The Role

We are looking for an experienced Data Engineer to transform raw data into clear, actionable insights. In this role, you'll partner with cross-functional teams to design and deliver intuitive dashboards and reports, optimize data pipelines, and support strategic decision-making across the organization.

What You'll Do

- **Develop & Maintain BI Solutions:** Design, build, and maintain interactive dashboards and reports that provide a real-time view of business performance.
- **Data Modeling & Pipeline Optimization:** Create and optimize data models and ETL processes to ensure reliable and timely data delivery.
- **Collaborate with Stakeholders:** Work closely with product, finance, and marketing teams to gather requirements and translate business needs into scalable technical solutions.

- **Data Quality & Governance:** Implement best practices for data integrity and governance, ensuring high standards of accuracy and consistency.
- **Drive Data-Driven Insights:** Analyze complex datasets to extract trends and patterns that inform strategic initiatives and fuel business growth.

What We're Looking For

- **Experience:** 3+ years in a business intelligence, data analytics, or related role.
- **Technical Proficiency:** Strong command of SQL and proven experience with BI tools (preferably Power BI).
- **Data Expertise:** Familiarity with data warehousing concepts and ETL processes.
- **Analytical Mindset:** Ability to translate complex data into clear, actionable insights that drive business outcomes.
- **Communication Skills:** Excellent written and verbal communication skills, with the ability to effectively collaborate across teams.

Nice to Have

- Experience with programming languages such as Python, R or C# for advanced data analysis.
- Knowledge of cloud-based data platforms, particularly **Microsoft Azure (Azure SQL Database, Azure Synapse Analytics, Azure Data Factory)** and **SQL Server**.
- Exposure to big data technologies and modern data architecture practices.

Why You'll Love Working With Us

- **Growth & Impact:** Play a key role in shaping our data strategy and driving business success.
- **Collaborative Environment:** Work alongside talented professionals who are passionate about using data to create real impact.
- **Competitive Benefits:** We offer a competitive salary package, comprehensive benefits, and opportunities for professional development.

Ready to Join Us?
