atriis

Team Leader of Software Engineering

Atriis Technologies
Location: Caesarea, IL or Porto, PT - Hybrid

About Atriis

Atriis – a travel tech SaaS company on its mission to enable true digital transformation in the travel industry, introduced the market with its disruptive technologies, helping travel companies (B2B and B2C) to reinvent the way how they create a unique traveler experience and explore unlocking new revenue lines streams for their business. We have cutting-edge technology with an amazing team of very ambitious employees, and we are causing a huge disruption in the industry!

The Role

We're seeking an experienced Team Leader for one of our engineering teams. In this pivotal role, you'll drive technical excellence, enhance system architecture, and mentor a team of talented engineers. Your expertise will ensure our backend (.NET) and frontend (Vue.js) applications deliver robust, high-quality, and scalable solutions on Microsoft Azure.

What You'll Do

- Lead and mentor a team of developers, fostering continuous improvement and innovation.
- Define and evolve technical architecture to ensure modularity, scalability, and high performance.
- Establish and champion coding standards, automated testing, CI/CD, and deployment best practices.
- Collaborate closely with product management, QA, and stakeholders to translate business requirements into technical solutions.

- Plan and execute strategic technical initiatives to continuously improve platform stability, performance, and maintainability.

What We're Looking For

- 8+ years in software engineering, including at least 3 years in a team lead or technical leadership role.
- Strong hands-on experience with .NET (C#), Vue.js, Azure cloud services, and MS SQL Server.
- Demonstrated ability to design modular, maintainable, and scalable architectures.
- Solid understanding and practical experience with OOP design patterns, SOLID principles, and Test-Driven Development (TDD).
- Expertise in automated testing, CI/CD pipelines, code reviews, and performance optimization.
- Proven mentoring skills with excellent interpersonal abilities.
- Clear communicator of complex technical concepts.

Nice to Have

- Previous experience in travel or aviation industry.
- Familiarity with microservices and message-driven architectures (Azure Service Bus, Kafka).
- Knowledge of container technologies (Docker, Kubernetes).
- Cloud security or architecture certifications (e.g., Azure Solutions Architect).

Why You'll Love Working With Us

- **Growth & Impact:** Play a key role in shaping our data strategy and driving business success.

- **Collaborative Environment:** Work alongside talented professionals who are passionate about using data to create real impact.

- **Competitive Benefits:** We offer a competitive salary package, comprehensive benefits, and opportunities for professional development.

Ready to Join Us?
